This is the same as the test_vectorpdf test, except with a table of contents.

This tests reading PDFs using the vectorpdf extension ("-e vectorpdf"). This extension relies on [pdfwr](#).

Here is page 6 from the demo manual:

2.9 Block Quotes

Block quotes consist of indented body elements:

My theory by A. Elk. Brackets Miss, brackets. This theory goes as follows and begins now. All nonredundants are thin at one end, much much thicker in the middle and then thin again at the far end. That is my theory. It is mine, and belongs to me and I own it, and what it is too.

Anne Elk (Miss)

Here's a reference to the above, [CIT2000], and a [nonexistent], citation.

2.14 Targets

This paragraph is pointed to by the explicit "example" target. A reference can be found under Inline Markup, above. Inline [hyperlink](#) targets are also possible.
Section headers are implicit targets, referred to by name. See [Targets](#), which is a subsection of [Body Elements](#).

Here is a portion of that same page:

	Header 2	Header 3	Header 4
	column 2	column 3	column 4
	Cells may span columns.		
	Cells may span rows.	• Table cells
