

# Figures with scaled PDF images and borders

This test combines something that test\_vectorpdf (reading a partial page) was doing with something that test\_issue\_266 (scale so large that it has to be scaled back down) was doing, and something test\_issue\_265 (test with borders) was doing, using the vectorpdf extension ("-e vectorpdf").

Basic image:

	Header 2	Header 3	Header 4
	column 2	column 3	column 4
	Cells may span columns.		
	Cells may span rows.	<ul style="list-style-type: none"><li>• Table cells</li><li>• contain</li><li>• body elements.</li></ul>	

Scaled up a bit:

	Header 2	Header 3	Header 4
	column 2	column 3	column 4
	Cells may span columns.		
	Cells may span rows.	<ul style="list-style-type: none"><li>• Table cells</li><li>• contain</li><li>• body elements.</li></ul>	

Scaled up a lot:

	Header 2	Header 3	Header 4
	column 2	column 3	column 4
	Cells may span columns.		
	Cells may span rows.	<ul style="list-style-type: none"> <li>• Table cells</li> <li>• contain</li> <li>• body elements.</li> </ul>	

Repeat the whole thing as a figure, with `with-border` class:

Basic image:

	Header 2	Header 3	Header 4
	column 2	column 3	column 4
	Cells may span columns.		
	Cells may span rows.	<ul style="list-style-type: none"> <li>• Table cells</li> <li>• contain</li> <li>• body elements.</li> </ul>	

Scaled up a bit:

	Header 2	Header 3	Header 4
	column 2	column 3	column 4
	Cells may span columns.		
	Cells may span rows.	<ul style="list-style-type: none"> <li>• Table cells</li> <li>• contain</li> <li>• body elements.</li> </ul>	

Scaled up a lot:

	Header 2	Header 3	Header 4
	column 2	column 3	column 4
	Cells may span columns.		
	Cells may span rows.	<ul style="list-style-type: none"> <li>• Table cells</li> <li>• contain</li> <li>• body elements.</li> </ul>
