Welcome to Issue 318's documentation!

```
Contents:
```

```
bool namespaced::theclass::method (int arg1, std::string arg2)
  Describes a method with parameters and types.
bool namespaced::theclass::method (arg1, arg2)
  Describes a method without types.
const T &array<T>::operator[] () const
  Describes the constant indexing operator of a templated array.
operator bool () const
  Describe a casting operator here.
std::string theclass::name
type theclass::const_iterator
format_exception (etype, value, tb[, limit=None])
  Format the exception with a traceback.
      Parameters:
                        • etype -- exception type
                        • value -- exception value
                        • tb -- traceback object
                        • limit (integer or None) -- maximum number of stack frames to show
      Return type:
                    list of strings
parrot.spam (eggs)
parrot.ham (eggs)
  Spam or ham the foo.
```
