## **Contents**

Inline Math		
<b>Math Directive</b>		

Bring rst2pdf math support to the level of sphinx's math extension.

## **Inline Math**

Since Pythagoras, we know that .

## **Math Directive**

This below should go in two lines:

Aligned equations:

Simple math can go as argument of the directive

The (1) label should point at this equation:

$$(a + b)^2 = a^2 + 2ab + b^2 \blacksquare (a - b)^2 = a^2 - 2ab + b^2$$

$$(a + b)^2 &= (a + b)(a + b) \$$

$$(a + b)^2 = a^2 + 2ab + b^2$$
