This is my first slide

- It has, of course, items in it

- More than one item

    1. Numbered lists, too

This is my second slide

rst2pdf can display code nicely:

```python
for x in range(7):
    print "cute!"
```

This is my third slide

Also, you can use math!

$$\frac{2 \pm \sqrt{7}}{3}$$

That is *not* an image.

This is my 4th slide

Other features include:

- Images, including SVG
- Tables
- Font embedding (Type1 and TTF)
- Extensible
- Background (like this one)
- Page transitions
